Powered by IBM Security Verify

Login into the IBM Cognos Dashboard by providing the right credentials in the login page. To access the Cognos dashboard for creating the data presentation charts and Dashboards.

2. Open The Cognos account Dashboard

The screenshot shows the IBM Cognos Analytics dashboard. At the top is a dark header with the text "IBM Cognos Analytics with Watson", a search bar, and user icons. Below the header is a "Quick launch" section with four tiles:

- Upload data**: Upload or drag and drop spreadsheets, csv files, and other data sources.
- Prepare data**: Use data modules to clean and connect data from multiple resources.
- Exploration**: Quickly find unbiased answers by identifying trends in your data with data exploration.
- Present data**: Create sophisticated, multi-page, multi-query dashboards, reports, or stories.

Below the "Quick launch" section is a "Get started" section with two tabs: "Get started" and "Recent". The "Get started" tab is active, showing a section titled "Get up and running in IBM Cognos Analytics". This section includes three columns:

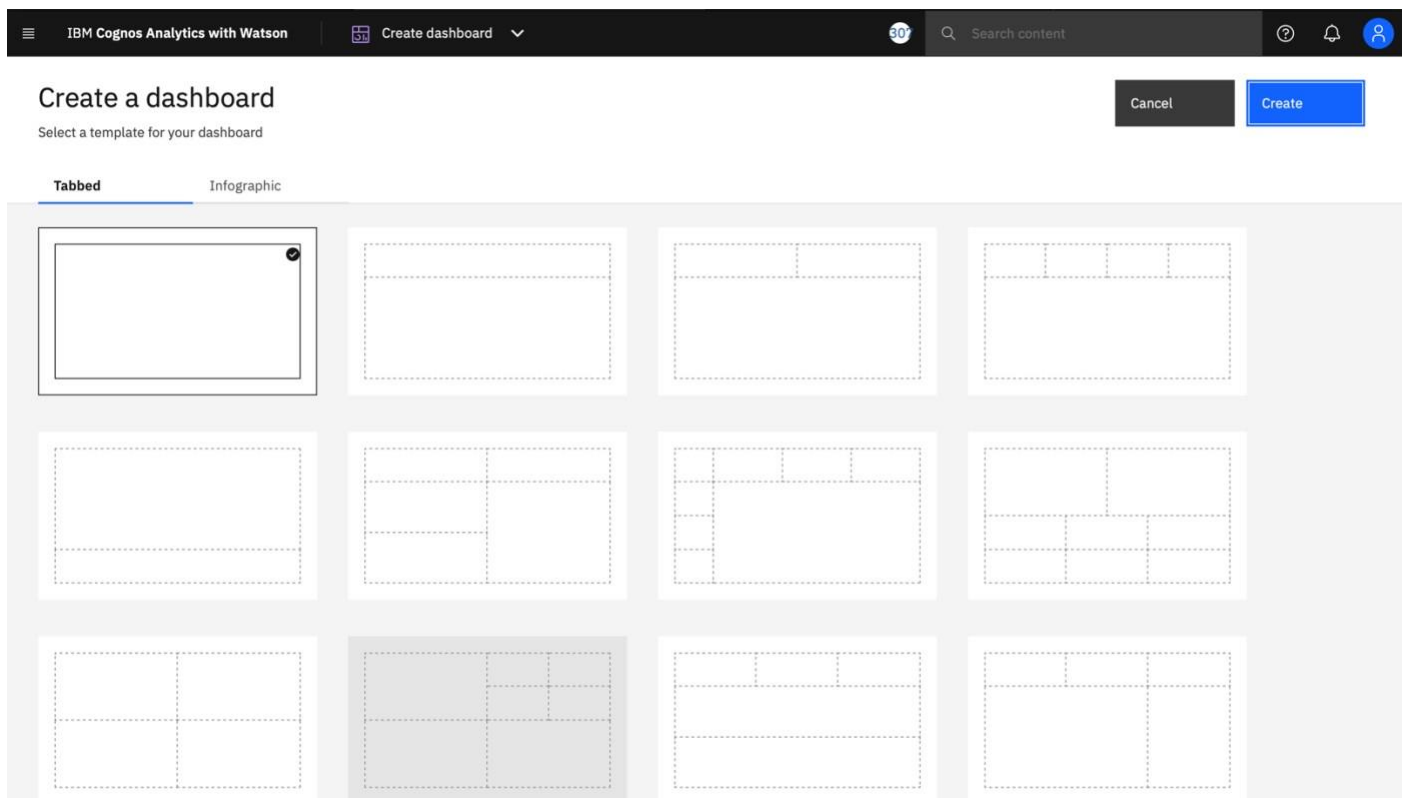

- How-to videos**: Learn how to use IBM Cognos Analytics and start gaining insights into your data. [Watch videos](#)
- Accelerator Catalog**: Browse a growing catalog of industry use, best practice guides, custom visualizations, and more. [Browse catalog](#)
- Learning resources**: Expand your knowledge and get assistance by connecting with the community, reading documentation, and watching videos. [Launch the learn pane](#)

3. Click on Present Data to create the Dashboards

This screenshot is identical to the one above, showing the IBM Cognos Analytics dashboard. The "Quick launch" section has four tiles: "Upload data", "Prepare data", "Exploration", and "Present data". The "Present data" tile is highlighted with a thick orange border, indicating it is the target for the next step.

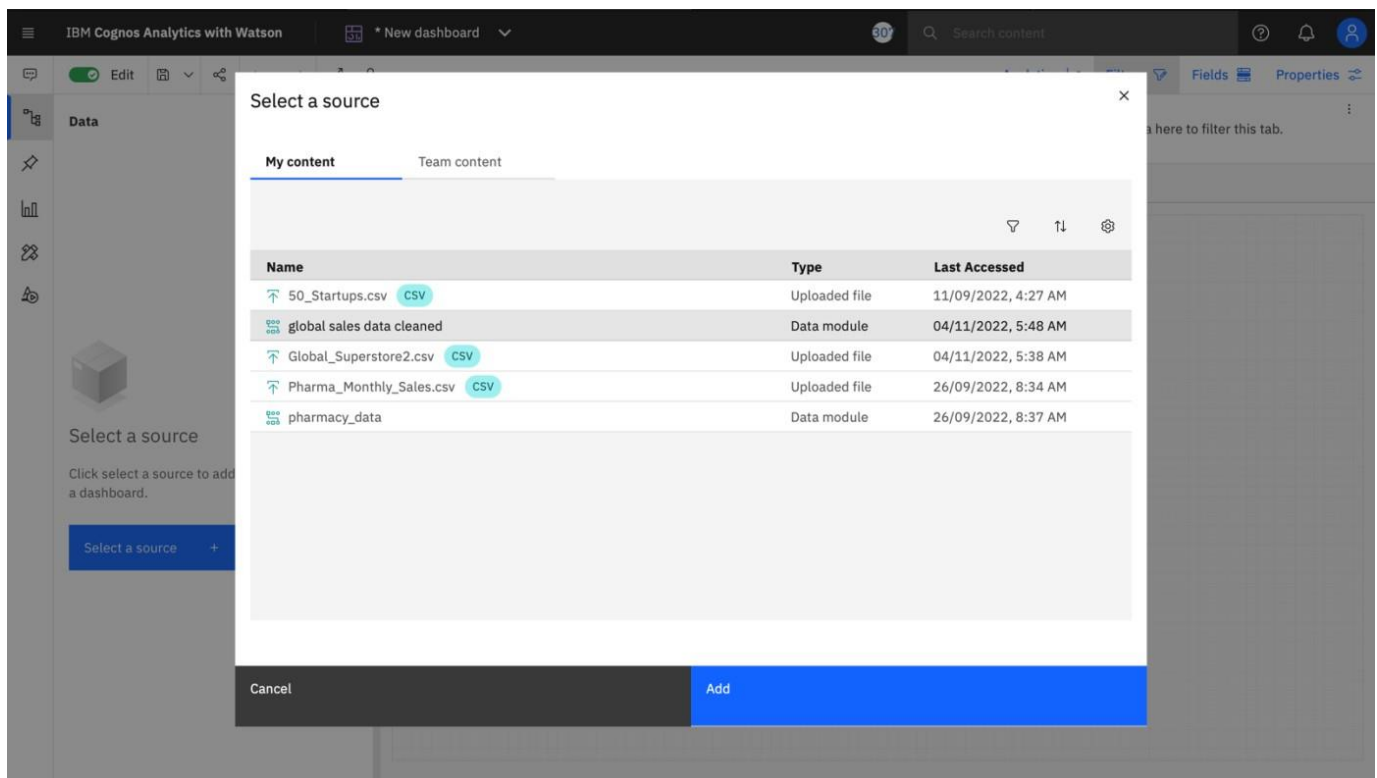

The Dashboards are used to get insights from the data and understand the business problems and create the analytical solutions to it and understand the data of the organization

4. Select the Dashboard Template to be created

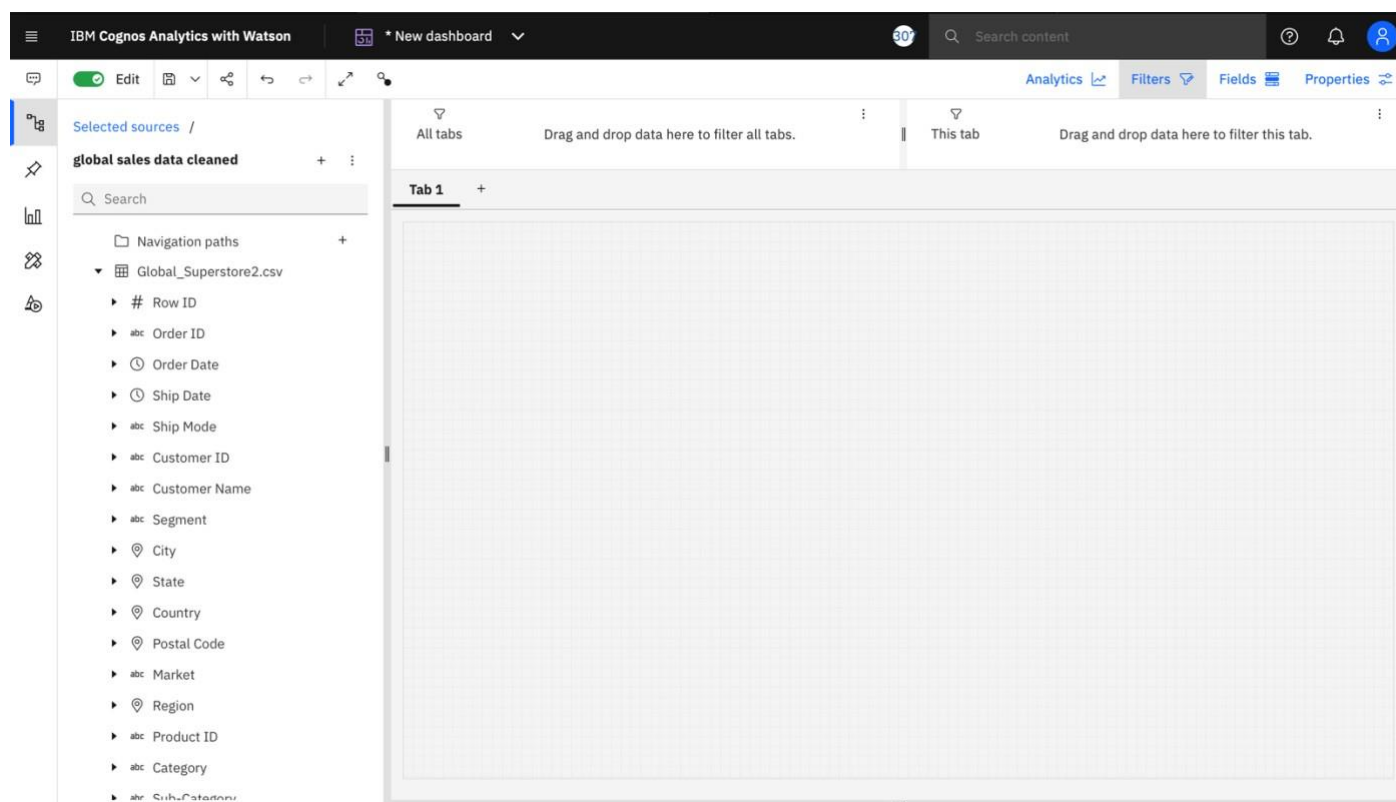

Now click on “Create” to create the empty dashboard.

5. Now select the Data source to create the dashboard.

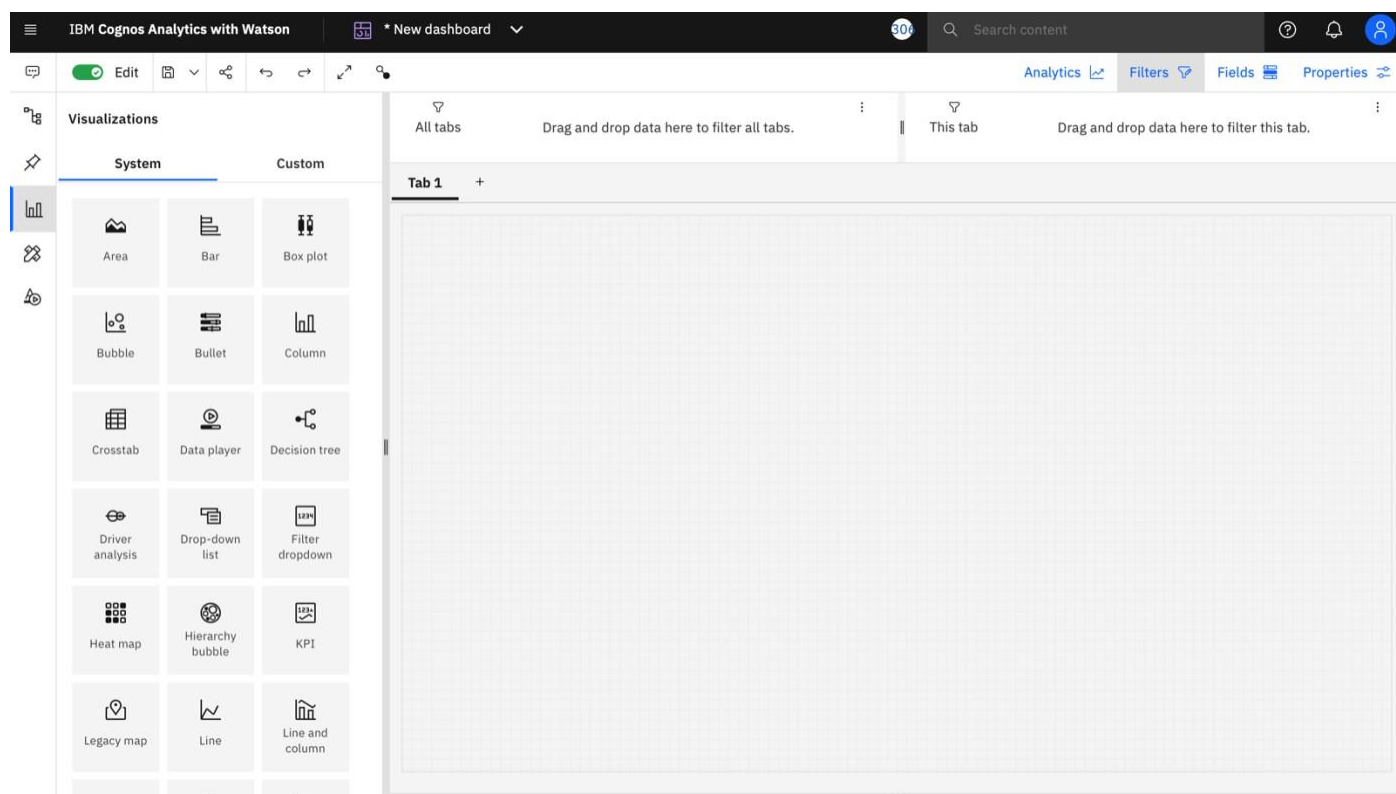

Now select the data source and click on “Add” to add the data source in order to visualize the data to get valuable insights from it.

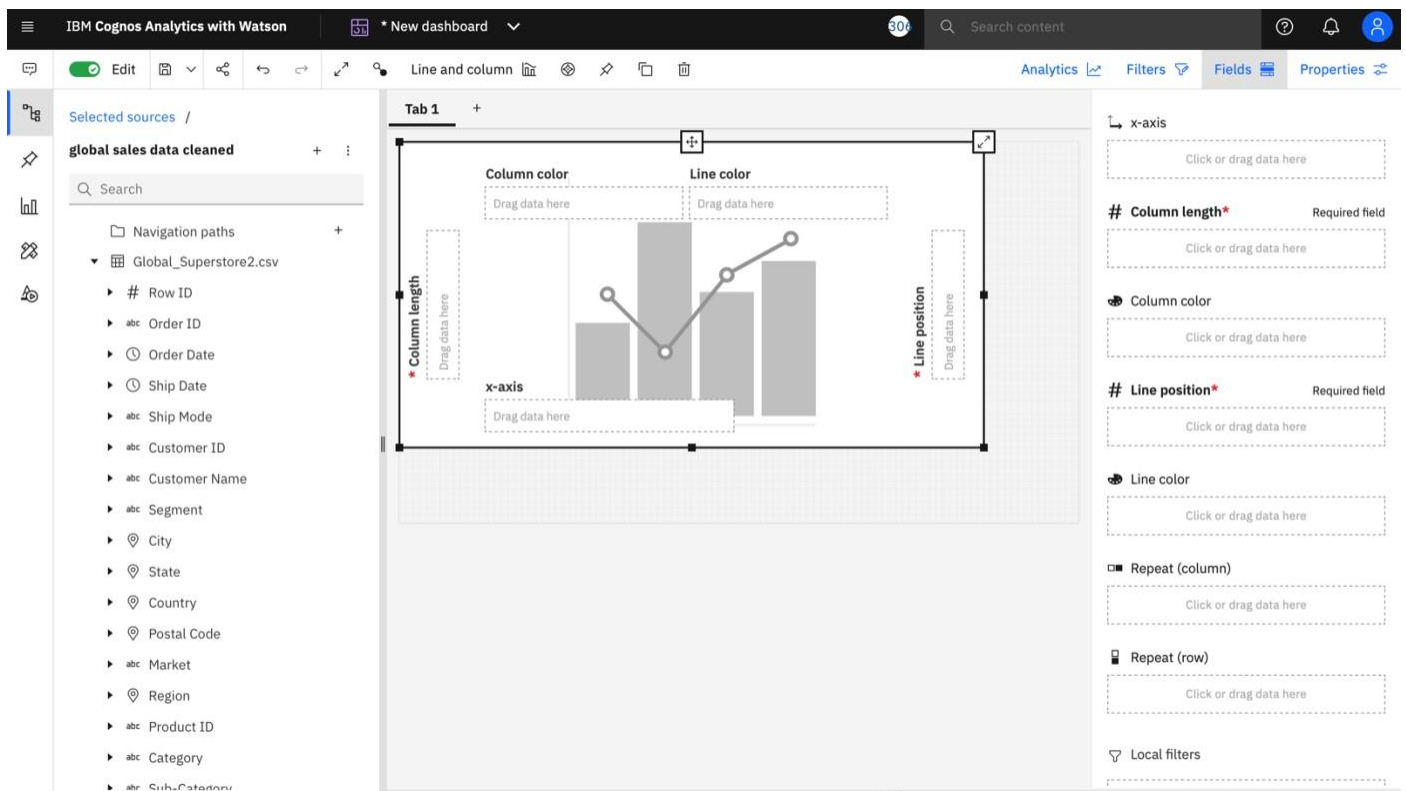

6. Exploring the Dashboard

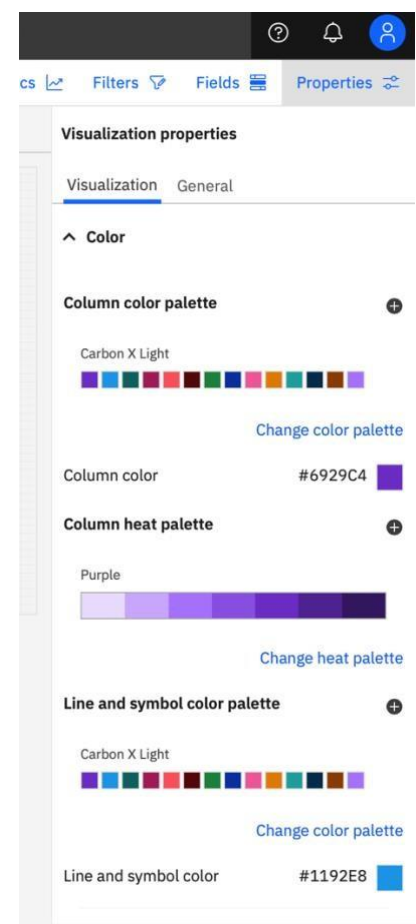

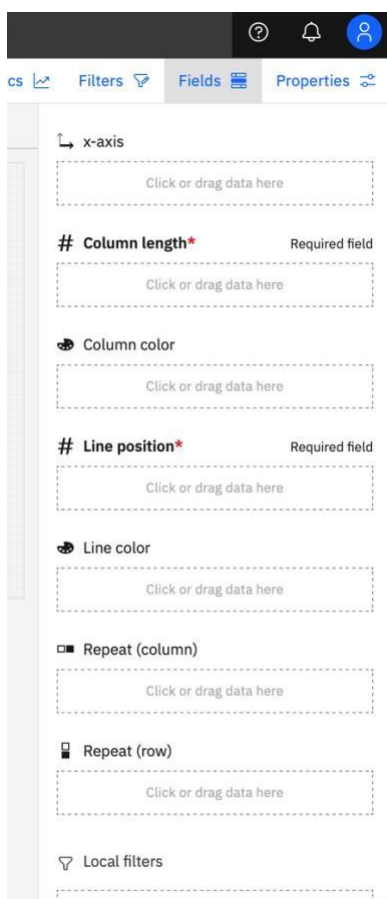

7. Now click on Visualizations option to create the charts

Select the Visualization charts based on the requirements.

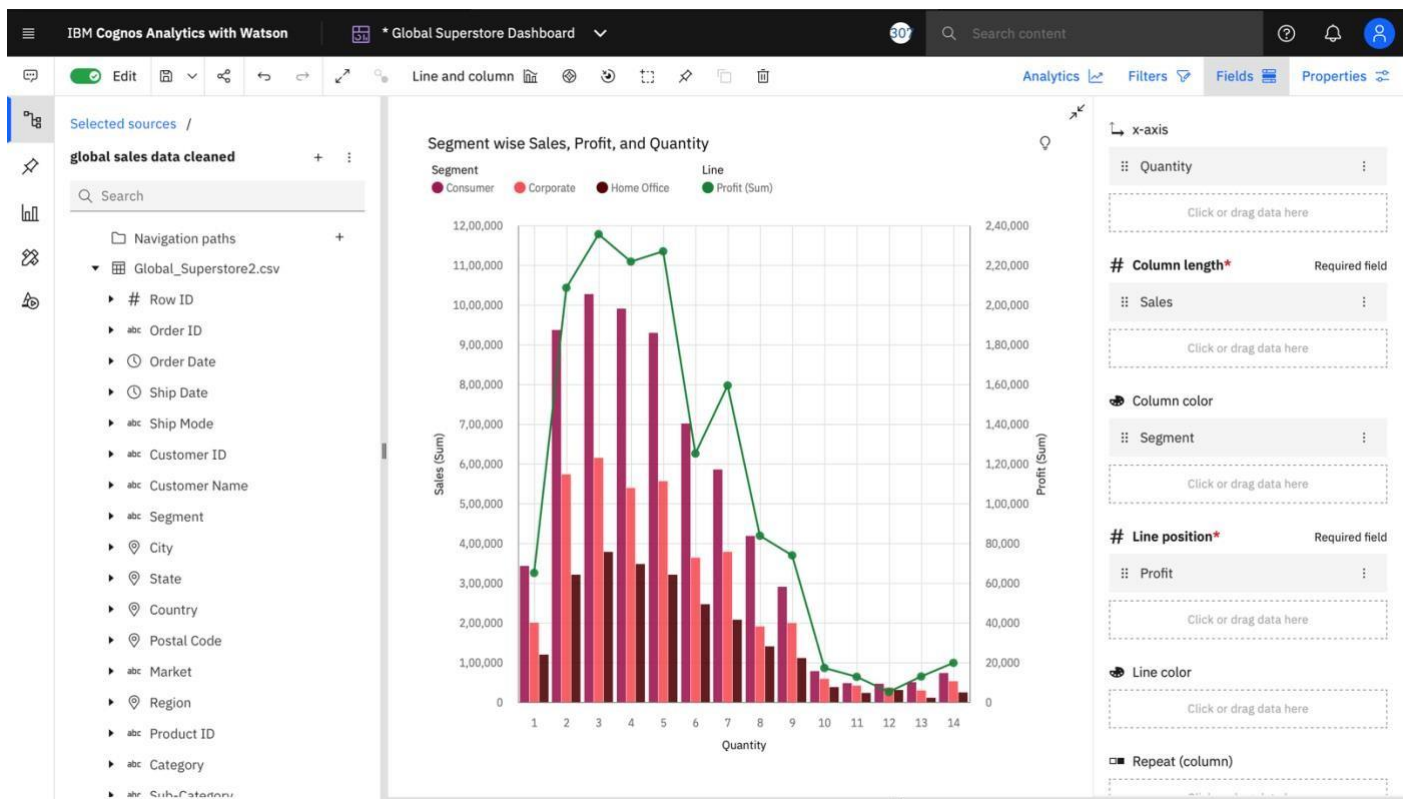

8. Chart Fields and Properties

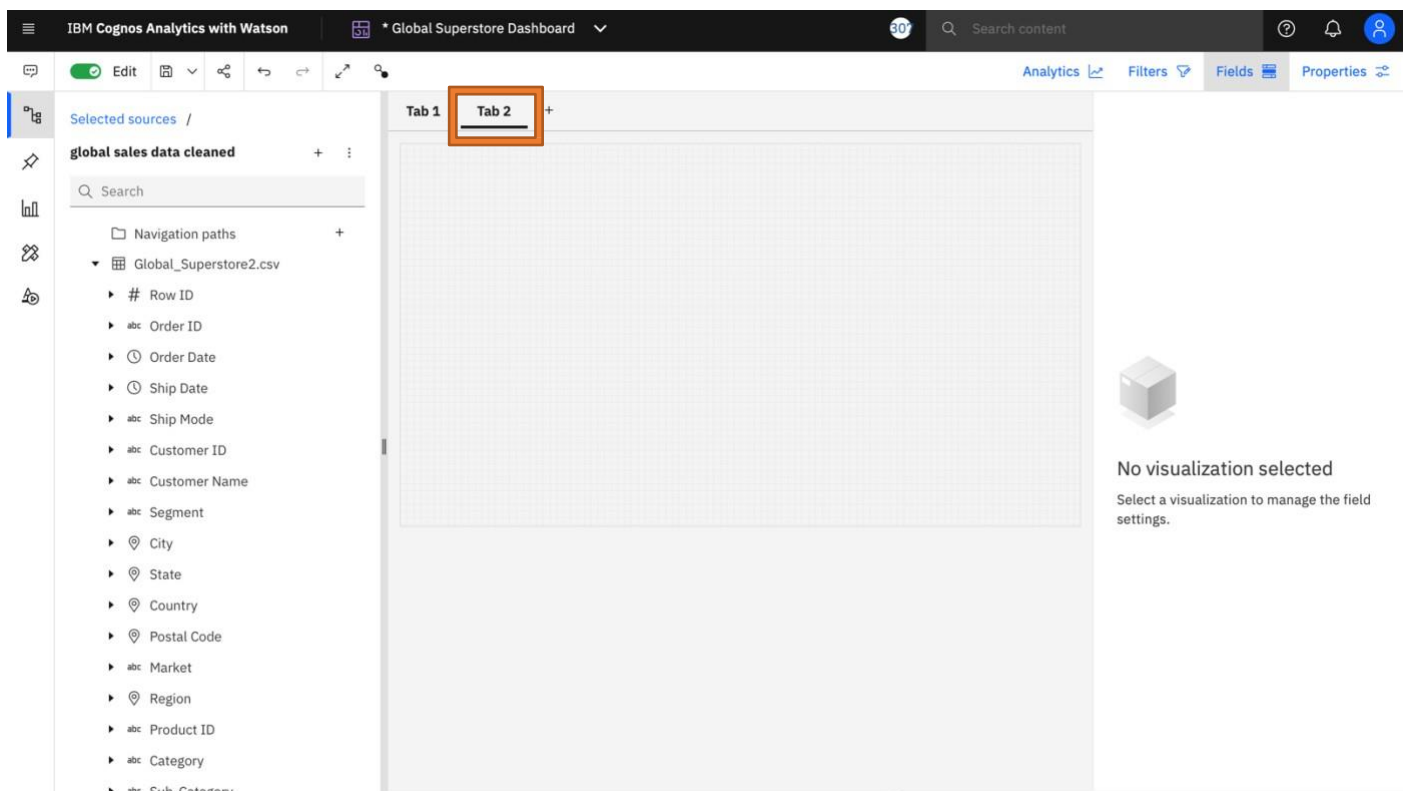

Add the Data to the Fields to understand and visualize that data in terms of the selected graph. To get information from it.

9. Segment wise Sales, Profit and quantity Analysis

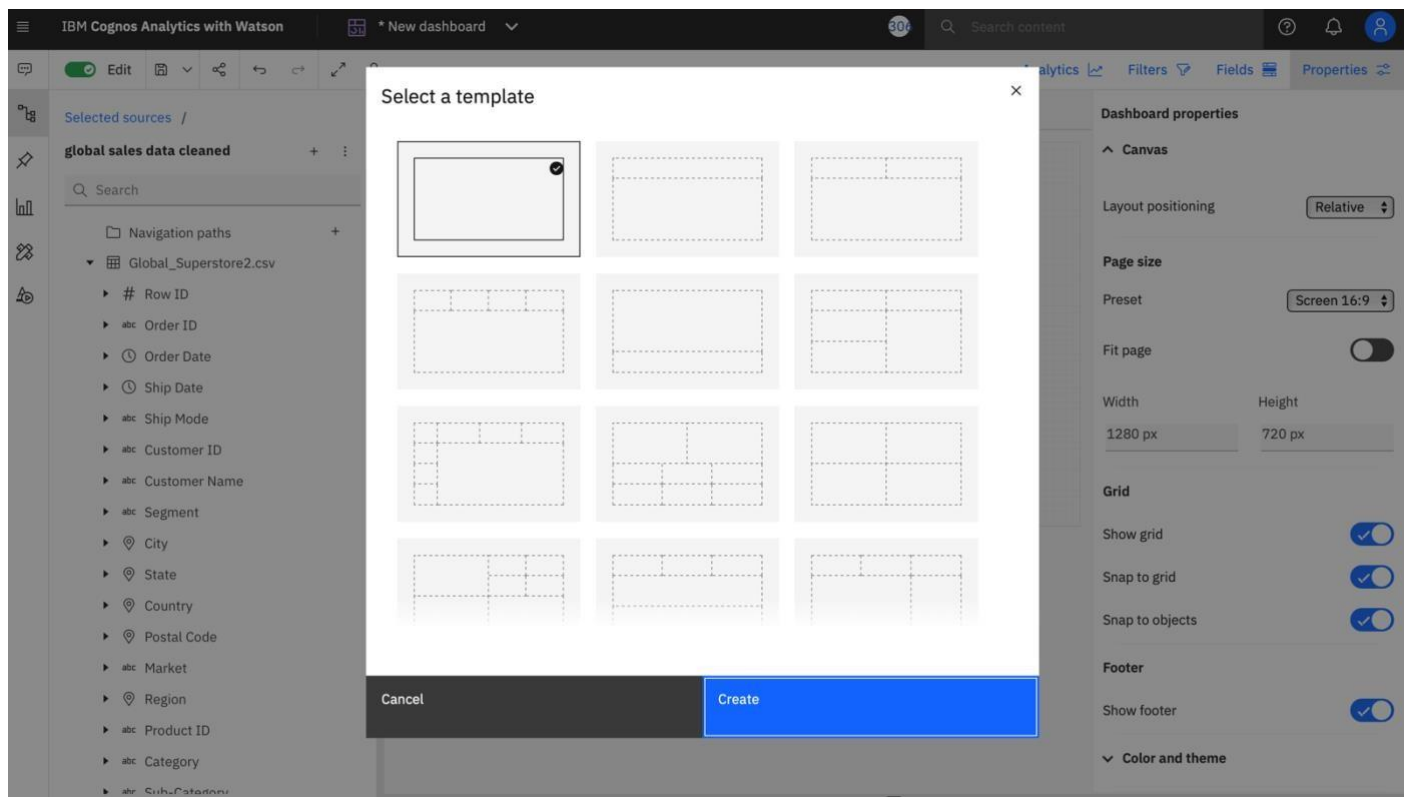

10. . Create a New Tab

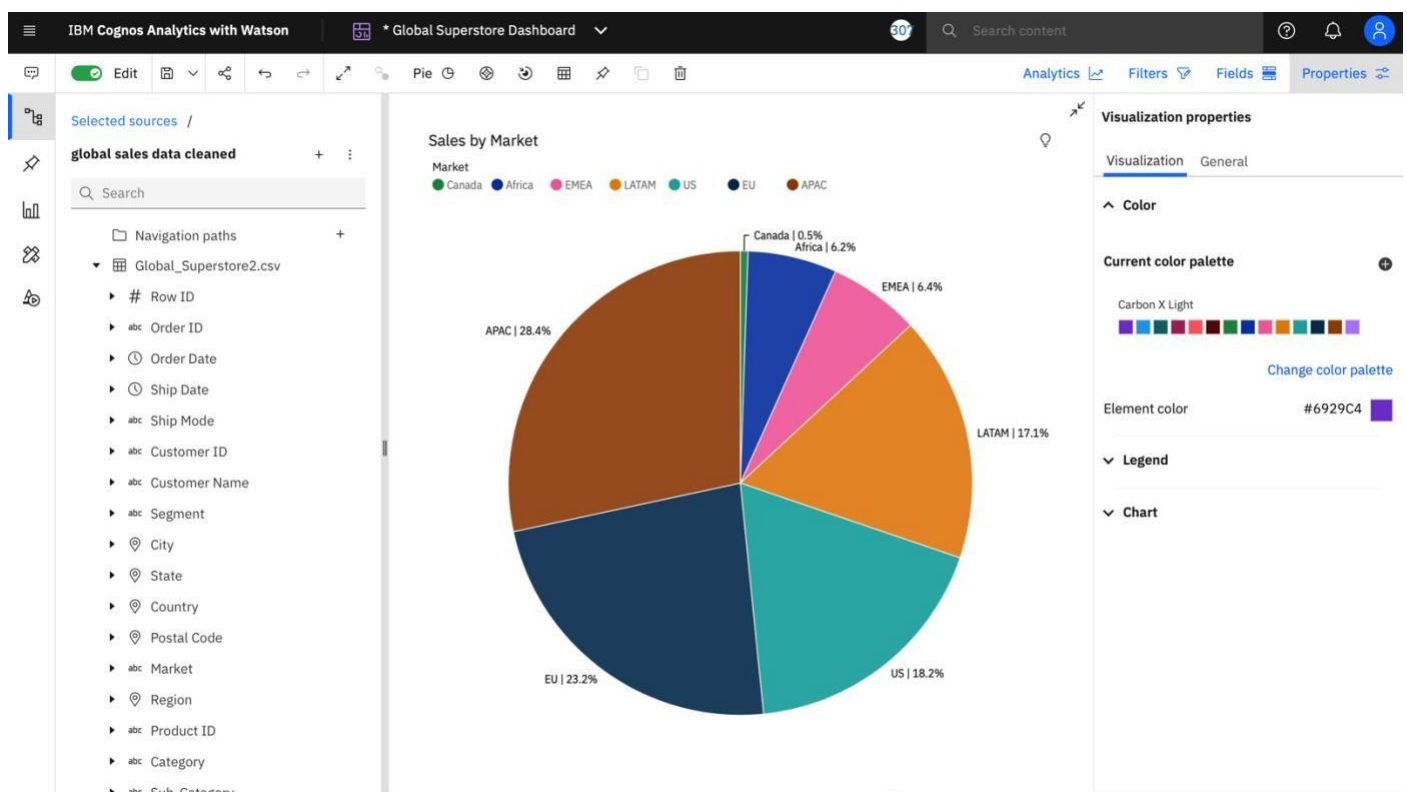

Click on the new tab option as shown in above figure to create a new Tab for creating another chart. We can have any number of tabs in this dashboard.

11. Select the Template for the Tab

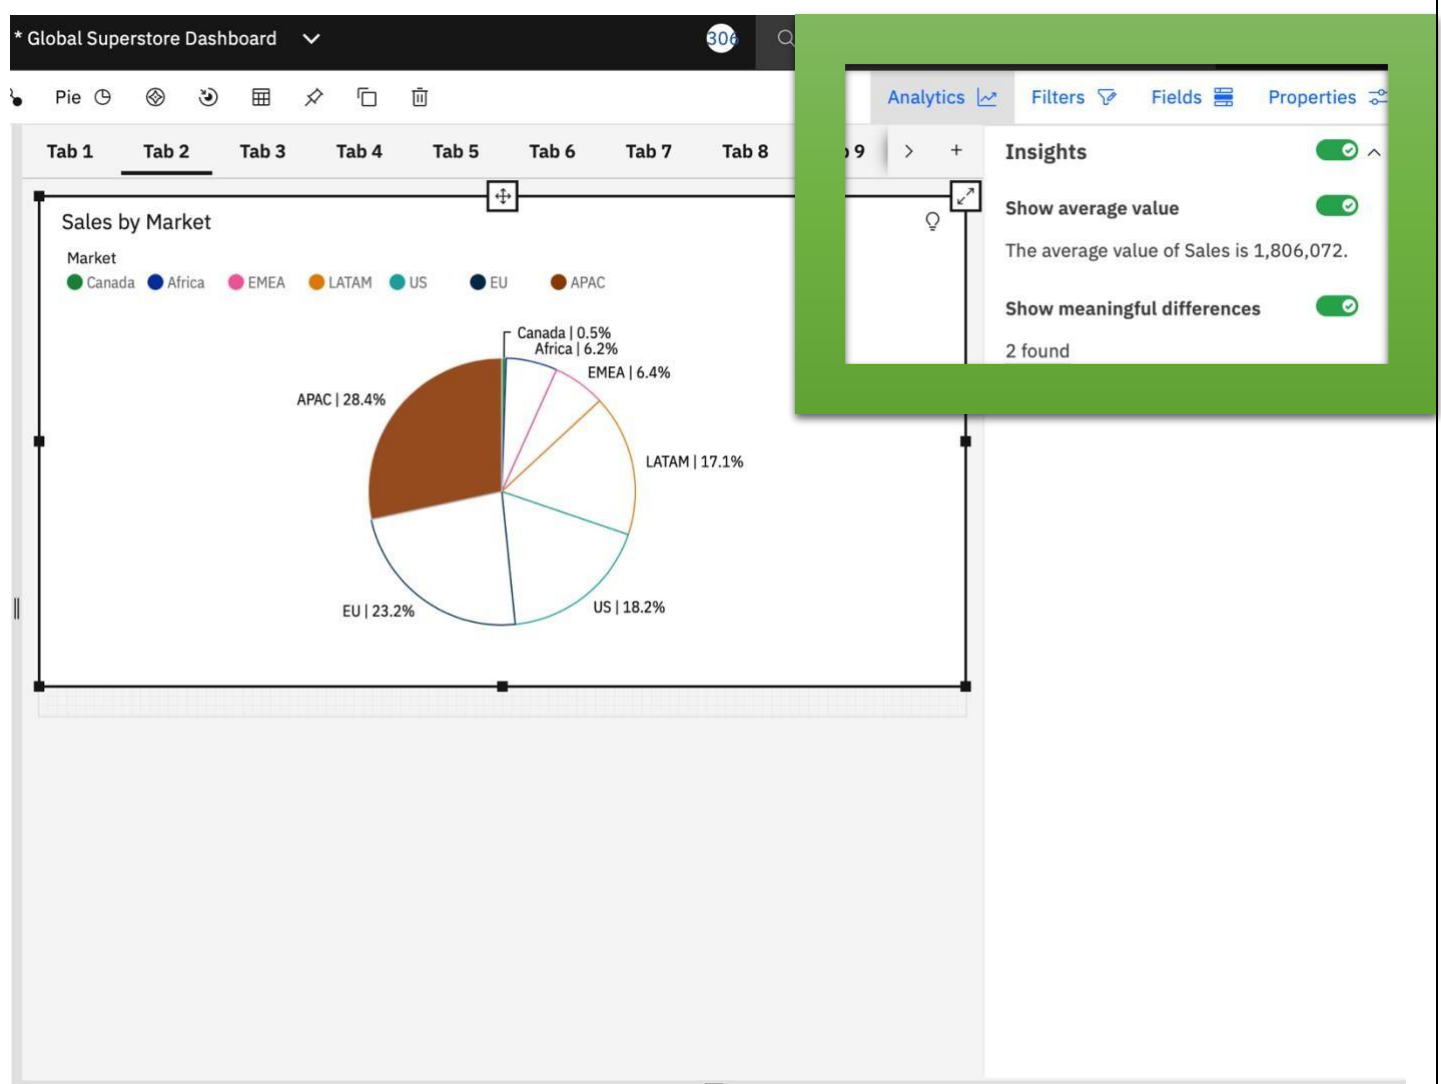

12. Sales By Market

The above Pie chart shows the Market wise sales analysis. By this visualization we can get the understanding about the data and the insights.

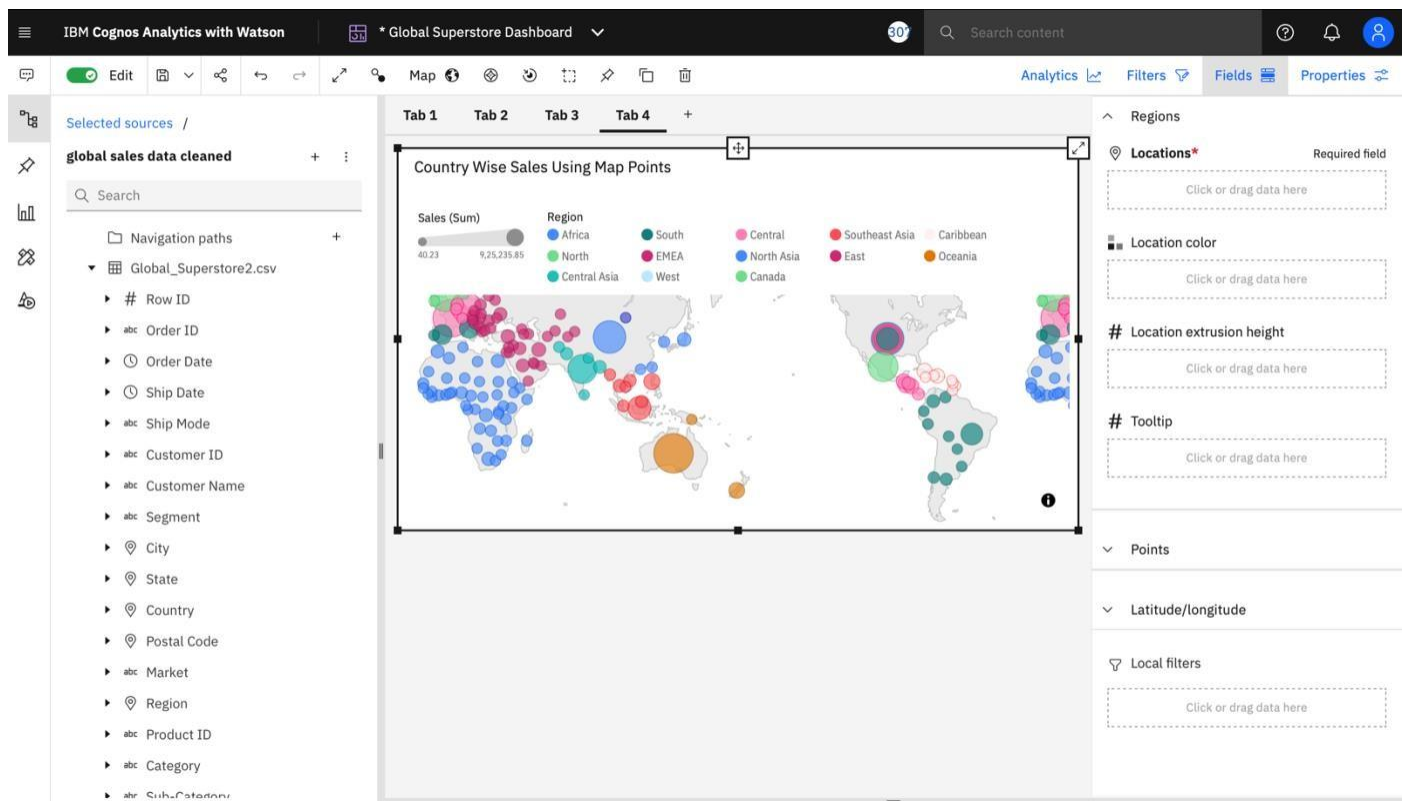

13. Getting Insights from the charts

Now click on the Analytics option at the right hand top of the menu bar and enable the Insights option to get the valuable insights out of the data. As shown in the below figure

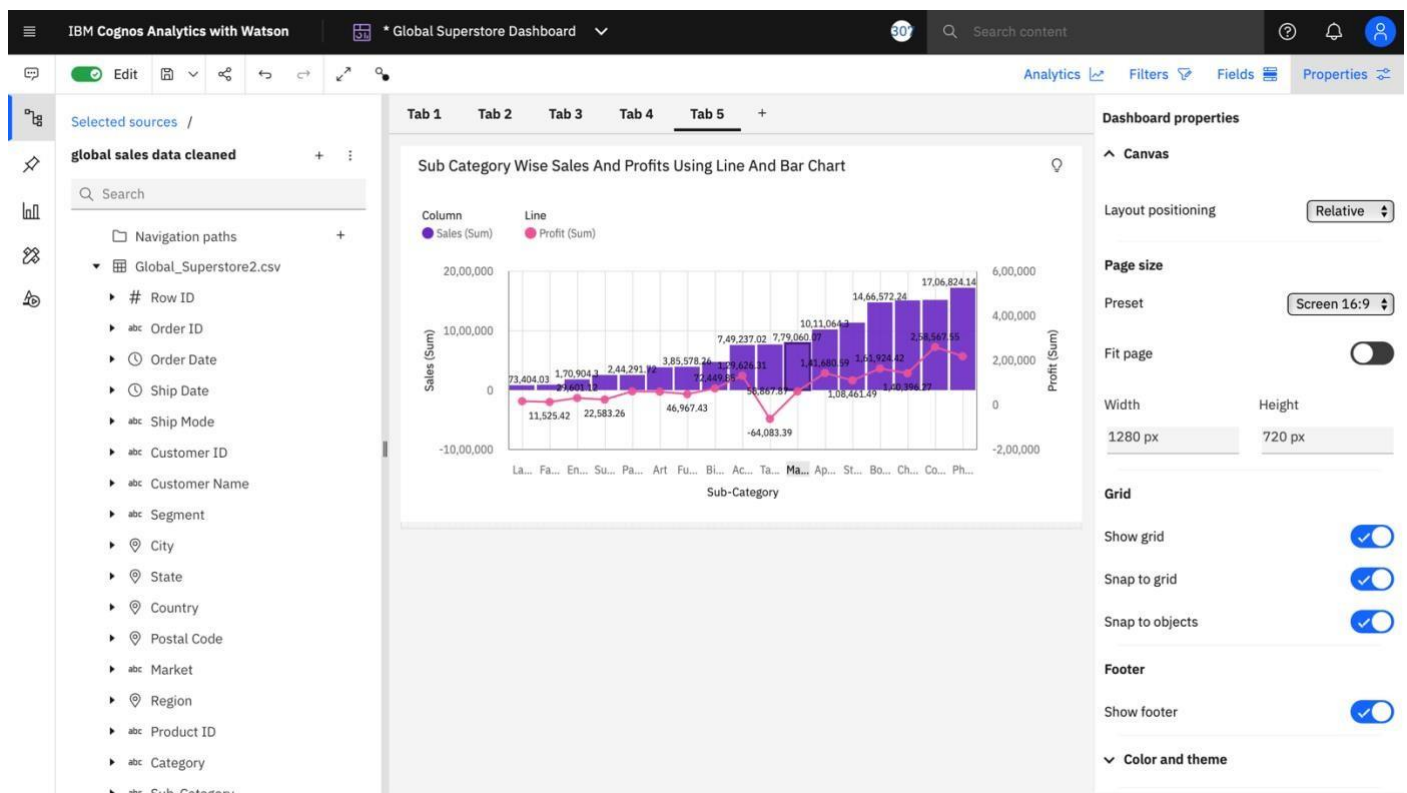

The Insights about the data gives the lot of information about the business problems. And give the meaningful data driven solution to it.

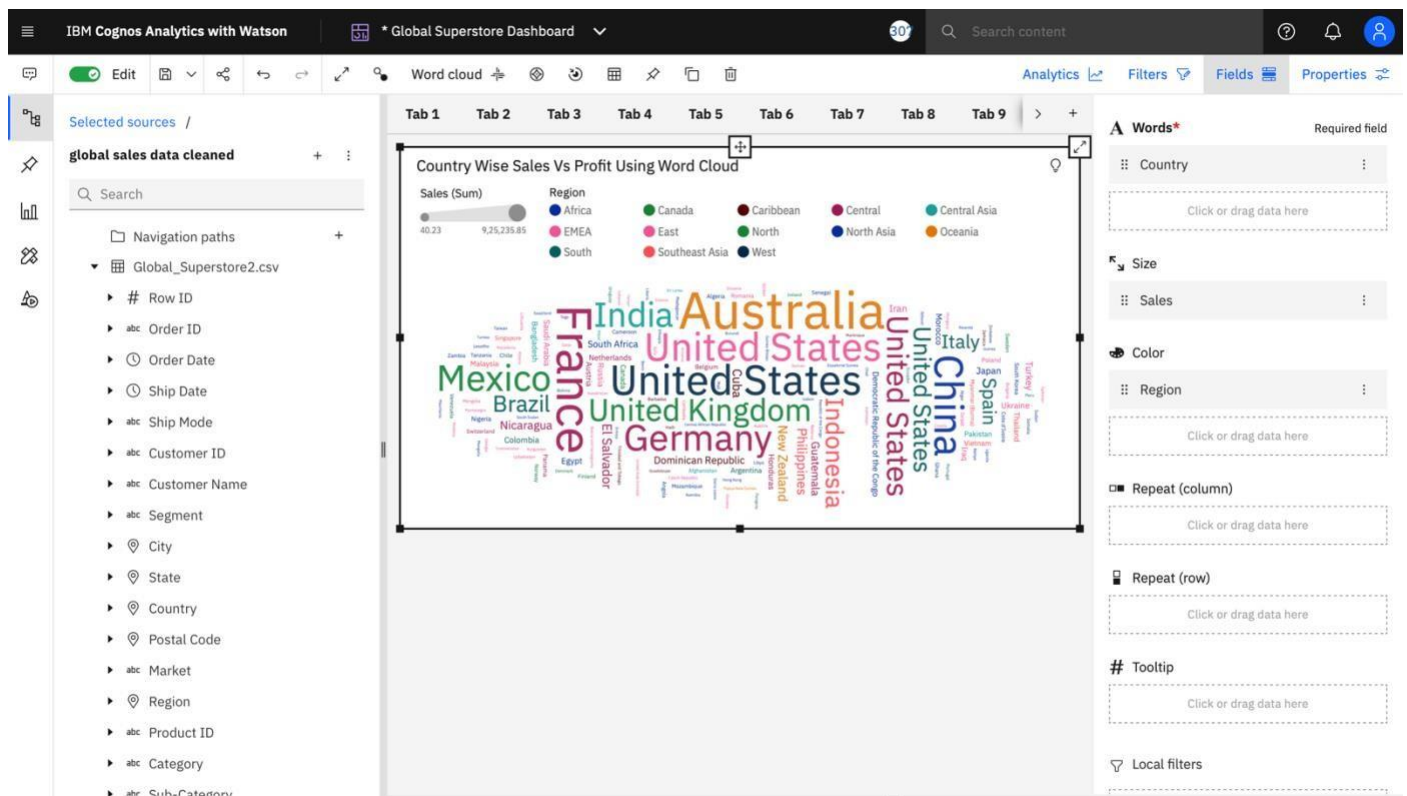

14. Country wise sales using the Map points.

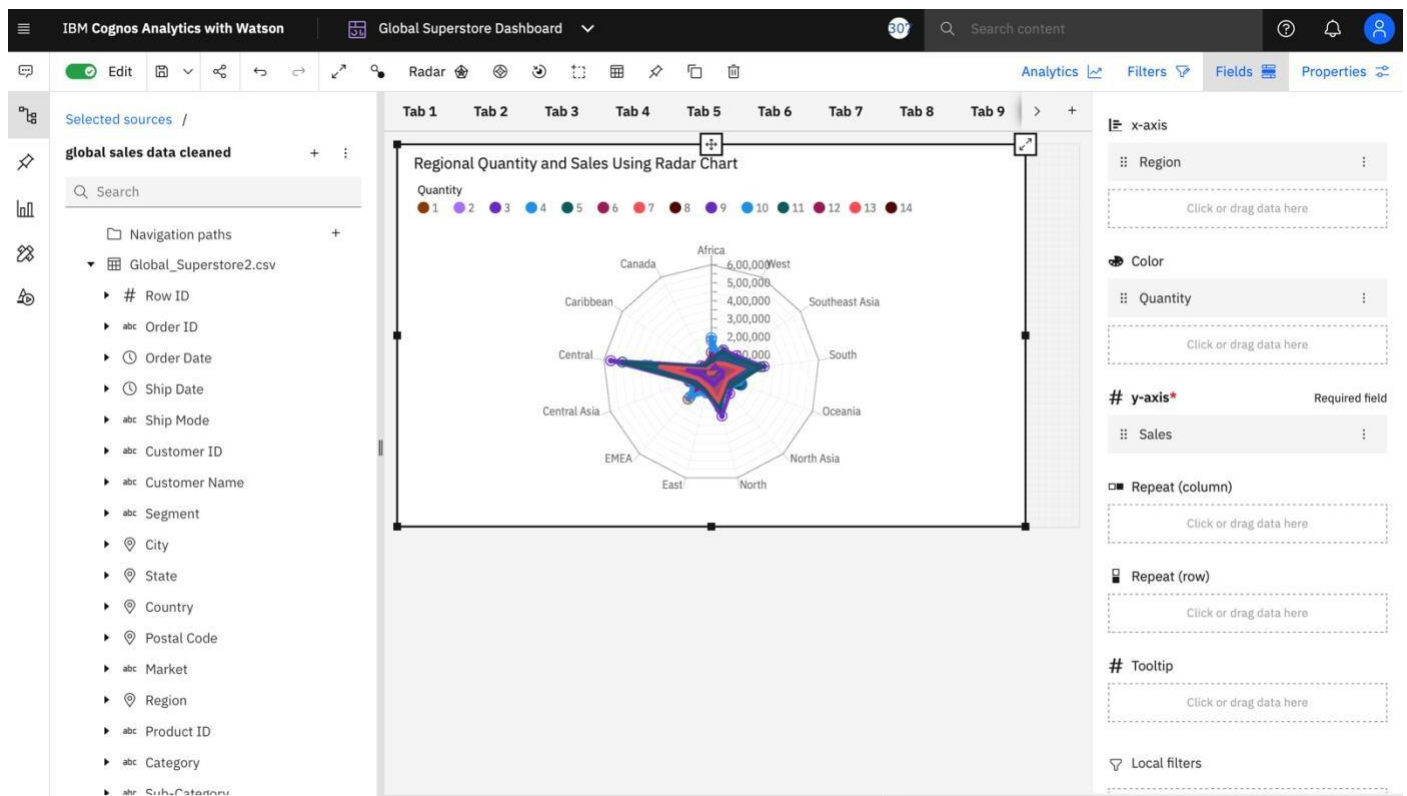

15. Sub category wise sales and profits using line and bar charts

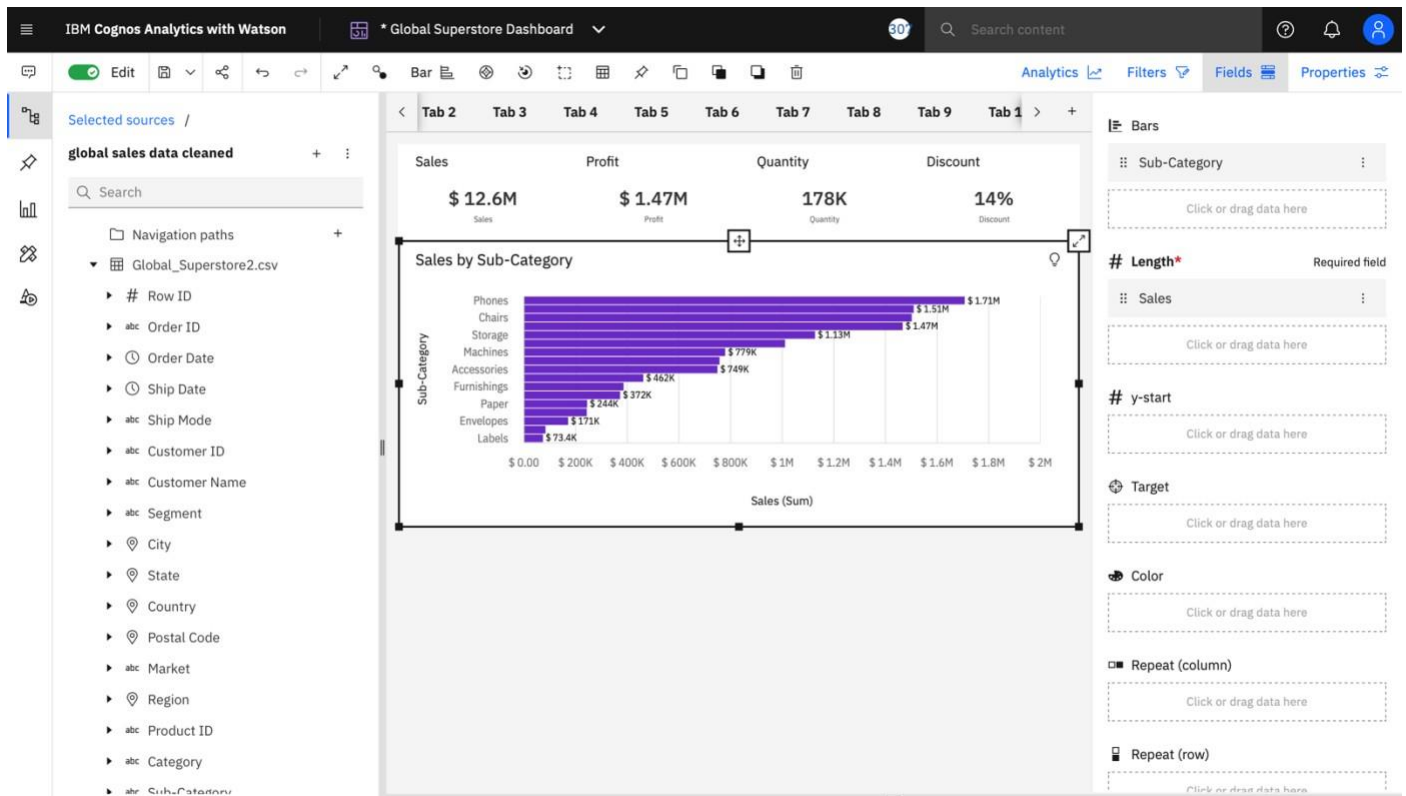

16. Country wise sales Vs profit using word cloud

17. Regional quantity and sales using Radar chart

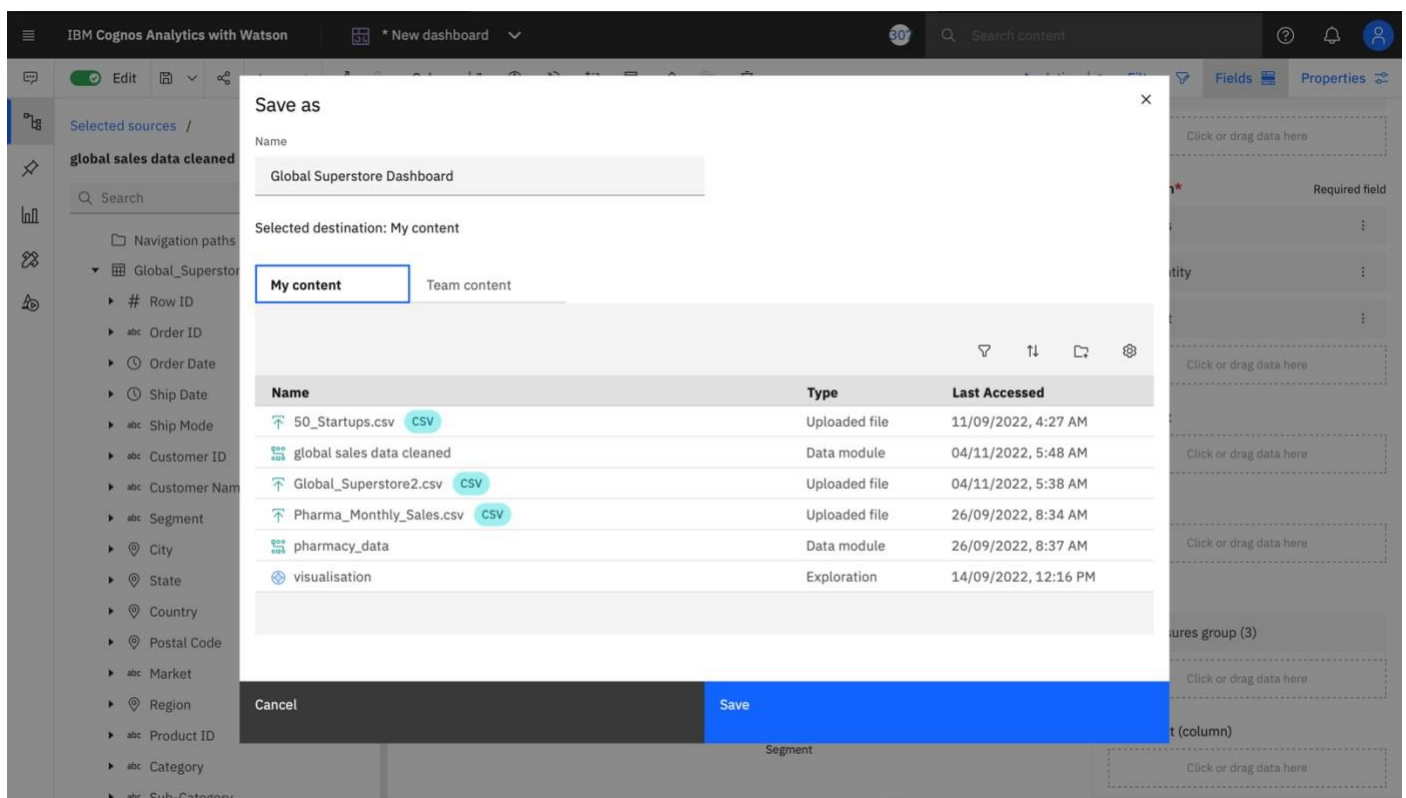

18. Creating a dashboard

By this Dashboard we can analyse the sales, profit, quantity, and discount of a product. And we can see the sales in terms of sub category wise.

19. Saving the dashboard

Finally Name the dashboard as Global Superstore Dashboard and click the save button to save the dashboard.
